

575	3.2		1225	11.6
600	3.3		1250	12.2
625	3.5		1275	12.8
650	3.7		1300	13.5

The resulting regression equation was then used to calculate the educational level table. A separate study of over 700 titles confirmed that their Accelerated Reader (reading management software) reading levels and Lexile ratings are correlated. A study on published Accelerated Reader and Lexile reading levels produces a very strong correlation.
