

When being in class, consider the following factors and determine the rating for each element:

- Routine and Systemic
- Quality of Application
- Quantity of Student Learning Item
- Frequency of Application

The factors are listed in order of importance from greatest to least. Therefore, the routine and systemic category carries more weight than frequency of application. The rubric below is intended to provide guidance and inform the implementation of the factors. Observe and hold the professional knowledge and judgment in determining the final item rating based on the rubric.

Factors to consider when using eleot:

EVIDENT

NOT OBSERVED
